

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of claims:

1. (Currently amended) A patch-containing packaging pouch comprising: a packaging pouch; and a patch, housed within the packaging pouch, in which a pressure-sensitive adhesive layer is formed on one side of a support, wherein

the pressure-sensitive adhesive layer is formed of a pressure-sensitive adhesive composition ~~containing~~ comprising

a pressure-sensitive adhesive comprising at least one compound selected from the group consisting of a styrene-isoprene-styrene block copolymer, polyisobutylene and an acrylic polymer, and

bisoprolol or a pharmaceutically acceptable salt thereof, ~~wherein the content of bisoprolol is~~ present in an amount of 1 to 50% by mass in the pressure-sensitive adhesive composition, and

wherein relative humidity inside the packaging pouch at 25°C is maintained at 25% or less.

2. (Previously presented) The patch-containing packaging pouch according to claim 1, wherein the relative humidity is maintained at 10% or less.

3. (Previously presented) The patch-containing packaging pouch according to claim 1, wherein a desiccant is further housed within the packaging pouch.
4. (Currently amended) The patch-containing packaging pouch according to claim 3, wherein the desiccant ~~is a desiccant formed of~~ comprises a substance which that physically adsorbs moisture.
5. (Currently amended) The patch-containing packaging pouch according to claim 3, wherein the desiccant ~~is a desiccant formed of~~ comprises a porous substance.
6. (Currently amended) The patch-containing packaging pouch according to claim 3, wherein the desiccant ~~is a desiccant formed of~~ comprises a porous substance ~~formed of at least one type of material selected from the group comprising~~ consisting of a metal oxide, zeolite and a clay mineral.
7. (Canceled)
8. (Previously presented) The patch-containing packaging pouch according to claim 1, wherein the packaging pouch has a blocking layer that blocks penetration of moisture.

9. (Previously presented) The patch-containing packaging pouch according to claim 1, wherein the packaging pouch has layer formed from polyacrylonitrile on the innermost side of said packaging pouch.
